PROFESSIONAL SUMMARY

Result-driven and versatile Business Analyst with a track record of implementing and optimizing business processes, workflows, platform strategies, and continuous improvement methods. An analytical thinker with attention to detail and a solid ability to demonstrate various requirement elicitation techniques. Proficient in complex data analysis with a proven track record of improving workflows and user experience. Demonstrates analytical skills, problem-solving mindsets, and business process knowledge; proficient in Microsoft Office, Google Suites, Excel, SQL, Power Bi, and CRM Tools. Dedicated to career growth and personal development within a fast-paced environment.

CORE COMPETENCES

- Data Entry
- Data Visualization
- Workflow coordination
- Stakeholder Management
- Process analysis and improvement
- Requirements gathering
- Cross-functional collaboration
- Business Intelligence
- End-User optimization
- Business Data analysis

Soft Skills

- Strong Communication
- Attention to detail
- Time management
- Adaptability and teamwork
- Problem-solving

WORK EXPERIENCE

Business Analyst, 10Alytics (Remote). **June 2026-Present**

- Demonstrated strong proficiency in collaboration platforms (Slack, Zoom, TeamViewer) to maintain effective communication with team members and stakeholders, ensuring timely updates on project progress.
- Partnered closely with development teams to achieve a clear understanding of requirements and actively participate in testing and quality assurance activities.
- Accurately identified and documented project scope, objectives, and constraints, while defining key performance indicators (KPIs) to measure solution success.
- Developed comprehensive Business Requirements Documents (BRDs) that align functional specifications with business goals and maintain consistency throughout the project lifecycle.
- Compiled and refine user stories to capture functional requirements, enabling seamless collaboration between stakeholders and development teams.

Production Operations Assistant, Cleland McIver **August 2026-Present**

- Analysed production processes across filling, stitching, sealing, and packaging operations to identify bottlenecks, inefficiencies, and opportunities for process improvement.
- Collected and analysed operational data, including production volumes, machine downtime, quality defects, and performance metrics, to support decision-making and reporting.
- Identified and investigated process and quality issues, gathering information and supporting root-cause analysis to improve production efficiency and reduce recurring problems.

- Collaborated with production, quality, maintenance, and warehouse teams to communicate issues, clarify operational requirements, and support effective problem resolution.
- Supported continuous improvement initiatives by identifying opportunities to optimise workflows, reduce downtime and material waste, improve quality, and achieve production targets.

Sales Associate | Business Operations & Analysis, NACK.
Aug 2019–Dec 2024

- Gathered and analysed customer requirements to recommend appropriate products and services, ensuring solutions aligned with customer needs and business objectives.
- Investigated customer queries and complaints, identified root causes, and collaborated with relevant teams to resolve issues efficiently while improving customer satisfaction.
- Processed customer transactions accurately and maintained detailed records, ensuring data integrity and compliance with company procedures.
- Acted as a liaison between customers and internal stakeholders, communicating customer needs effectively to support service delivery and issue resolution.
- Analysed customer feedback and service trends to identify opportunities for process improvements, contributing to enhanced customer experience across multiple touchpoints.

EDUCATION

- **2026** University of Salford (MSC Operations management and Business analytics)
- **2015** Ajayi Crowther University (B.Sc. Economics)
